

DOMINO

SCREEN FRAME

The **DOMINO FRAME** system is a versatile screen support solution. The system can be suspended, self-supported, wall mounted or attached to any structure. In fact, the Domino can be crafted into virtually any configuration, shape and size imaginable. The screen surface can be wrapped around the structure for a frameless look, or masked for a neatly outlined image. The sturdy steel design is safe, easy to install and can be moved when not in use. Ideal solution for theatres, live venues and broadcast applications. Available with any **Strong | MDI** front or rear projection screen surface.

Applications include: Theatres, live venues, educational, worship facilities, broadcast and rental/touring systems.
