

POLIVIEW TAB-TENSION

SMALL MOTORIZED SCREEN

The **Poliview** tensioned motorized screen includes a reliable and fully integrated operating system making it an excellent match for heavy-use environments.

The auto-tension knob and durable tabs ensure that the screen is consistently free of wrinkles, even after years of regular use. There is no need to use lower grade reinforced vinyl material to keep the screen flat and as a result, higher cinema-grade screen surfaces can be used.

Poliview includes control functionality for remote operation through either a wireless handheld remote or through a closed contact low voltage system like a screen trigger, wall switch or automation system.

Applications include: conference rooms, media rooms, training sites, museums, educational and worship facilities.

FEATURES

- ▶ Auto-tension knob
- ▶ Side tension tabs
- ▶ Custom black PVC welded borders and black drop
- ▶ Enhanced heavy duty tubular motor
- ▶ Adjustable drop/retraction limit
- ▶ Built-in control center
- ▶ IR remote control system
