

STRUCTURES

SCREEN SUPPORT SYSTEMS

Our innovative screen support structures are custom built to adapt to virtually any venue requirement, with a unique self-standing modular construction that allows for easy assembly and adjustable size.

Access ladders and catwalks ensure hassle free set up and maintenance, while our detailed easy-to-follow instructions walk you through every step.

All aspects of production, from design to shipment, are completed in one single location under the close supervision of our mechanical designing and engineering teams. This process, combined with our high-quality standards, guarantees a durable, practical and safe final product.

APPLICATIONS INCLUDE:

Wall-to-wall wrap around cinema screens with custom curve and tilt, theme park rides, 4D systems or simulators requiring flat or curved screens up to 360°.

OPTIONS:

- ▶ *Speaker platforms and extensions*
- ▶ *Professional seal according to regional requirements*
- ▶ *Custom curve and tilt*
- ▶ *Available with any screen surface*
