

ORION

OPTICAL FLOOR TILES

For an ever more immersive experience, projection on the floor becomes essential. Orion commercial grade optical flooring tiles allow the technical team to visually maintain a seamless transition within the immersive environment. Ultimately, minimizing the need to recalibrate the media between the horizontal and vertical projection surfaces. The matte gray, low gain coating is inherent within the commercial grade flooring tile making it a durable projection surface. The optical floor tiles are engineered to withstand heavy foot traffic while maintaining excellent optical performance for countless years. Orion floor tiles are the perfect foundation for any extraordinary experience.

Orion Optical Floor Tiles can be installed on any surface or combined with the [Seismos Interactive Flooring System](#) for a complete motion-based optical flooring system.

Orion tiles

Floor with no treatment

BENEFITS

- ▶ Similar optical properties as a projection screen
- ▶ Excellent color reproduction and contrast
- ▶ Utilises a magnetic hold down system for easy installation, maintenance and motor access
- ▶ Impact resistant
- ▶ Matte finish minimizing reflection of light on surface
- ▶ Easy to clean, easy to replace
